CHASE NURSERY COMPANY

HUNTSVILLE

ALABAMA....

Huntsville, Ala. January 22nd, 1912

TO THE TRADE :

We mail these Bulletins to the Nursery Trade frequently during the Spring season; this issue goes to several hundred new addresses. If you do not receive future issues drop us a line that we may see if your name is on our regular mailing list.

We call special attention to our assortment of Transplanting Stock—Small Fruit Trees, Ornamentals, Shrubs, Imported and American grown Stocks and Seedlings, Roses, etc. This Transplanting Stock is graded high, well rooted, clean and will earn good dividends for you. Our Seedlings, both Imported and Domestic, are handled under the personal supervision of our Mr. Robert C. Chase, satisfaction guaranteed. About five car loads imported stocks and seedlings now en route from France.

Nurserymen's Supplies are a specialty with us. We are headquarters for the celebrated French Pruning Shears, both sizes always in stock, also extra springs for same. We usually ship all supply orders on next train after receipt.

Orders are booked in rotation as received. We do not substitute unless instructed, and as many items will sell quickly, it would be well to name "second choice" where possible.

Terms and conditions of sale as per our regular trade list, copy on request.

Cash with order where purchaser's credit is unknown to us.

Boxing extra except as noted.

Freight prepaid to our distributing points—St. Louis, Rochester and Philadelphia—when shipments can be included in our regular car lots to these points.

Prompt personal attention to all orders.

Yours very truly,

CHASE NURSERY COMPANY

ROSES

A photograph of our Freierr Von Marschall, Own Roots in three grades. Notice the root system.

Will be pleased to submit samples of any varieties or grades. We grade high, which means that when in DOUBT as to just where a plant belongs, it goes in the LOWER grade. The grades will run as follows.

No. 1.—Hybrid Perpetuals and Climbers carry 24 to 30 inches of wood. Teas, Hybrid Teas, etc. carry 12 to 24 inches of wood, depending on their nature and habit of growth. All plants, stocky, well rooted, with three or more branches.

No. 2.—Hybrid Perpetuals and Climbers carry 18 to 24 inches of wood. Teas, Hybrid Teas, etc. 10 to 18 inches. All plants stocky, well rooted with three or more branches.

No. 3.—An unusually good grade this season, as we have a lot of stocky, well established little plants just under the requirements of our No. 2 grade. These will do for mailing in many instances, fine for transplanting. Ask for a sample.

EVERGREENS

Evergreens described below have been at least twice transplanted; plants are grown wide apart in rows, giving each one room to develop, and are perfect specimens. We will use every precaution in handling evergreens to keep roots from exposure, but we recommend digging them with a ball and burlapping. For price handled in this manner add ten cents per plant to the grades three feet and up, five cents per plant to the two to three feet grade and smaller.

PRUNING SHEARS

WATCH SPRING, FRENCH, 8 Inch. Per pair postpaid, \$1.35; per dozen pairs, freight or express (weight per doz. pairs 7 lbs) \$14.50.

WATCH SPRING, FRENCH, 9 Inch. Per pair postpaid, \$1.70; per dozen pairs, freight or express (weight per dozen pairs 11 lbs) \$17.00.

The Watch Spring French Shears stand at the head of the list for making cuttings of all kinds. For this work the 8 inch size is just right. For cutting back seedlings to the bud or any heavy work the 9 inch is recommended.

In makings cuttings the shears used should make a quick, clean cut (which these shears do to perfection) and they should have a properly proportioned grip to enable the operator to do a full days work without cramp. We have used this make for years and find that it fills the bill better than any other we've tried. Once in a while a spring will break. We now import extra springs and can supply either size at all times
